PROFESSIONAL SUMMARY

Computer Science undergraduate at Chandigarh University with hands-on experience in Full-Stack Development, DevOps, and Cloud Infrastructure. Proficient in Python, Java, React.js, Docker, Kubernetes, Jenkins, and AWS. Passionate about AI-native engineering and actively leveraging LLMs, AI coding assistants, and automated CI/CD pipelines to build scalable, production-ready software solutions.

TECHNICAL SKILLS

Programming Languages	Java, Python, JavaScript, SQL
Frontend & Backend	React.js, Node.js, Express.js, RESTful APIs, Responsive Design
Cloud & DevOps	AWS (EC2, S3, IAM), Docker, Kubernetes, Jenkins, GitHub Actions, Linux, Nginx
AI & Modern Tooling	AI Coding Assistants (GitHub Copilot, Claude), Prompt Engineering, LangChain, RAG Architecture
Databases	PostgreSQL, MongoDB
Core Concepts & Tools	Data Structures & Algorithms, OOP, System Design, Git, VS Code, Postman

EDUCATION

Chandigarh University Bachelor of Engineering in Computer Science CGPA: 7.14	Mohali, Punjab, India July 2023 – July 2027
HD Sr. Sec. School Intermediate (Class XII) — 81%	Jhajjar, Haryana, India 2021 – 2022

PROJECTS & ENGINEERING EXPERIENCE

AutoOps: AI-Powered Predictive & Self-Healing DevOps Platform Technologies: React.js, Node.js, FastAPI, PostgreSQL, Docker, Kubernetes, GitHub Actions, Prometheus, Grafana	Active Development
- Engineered an AI-driven DevOps automation platform using FastAPI, Docker, and Prometheus/Grafana to automate deployment pipelines and real-time operational monitoring. - Containerized multi-service microservices using Docker and orchestrated deployments with Kubernetes, cutting deployment rollout time by 40%. - Automated generation of Dockerfiles, Kubernetes manifests, and GitHub Actions workflows by analyzing target repository structures.	

Task-Flow: Cloud-Native Task Management System Technologies: React.js, Node.js, Express, MongoDB, Docker, Kubernetes	GitHub Repo Live Demo
- Developed a full-stack task management application enabling real-time task tracking and user collaboration. - Built 10+ RESTful APIs with Node.js/Express and JWT authentication, optimizing MongoDB database queries to reduce response latency. - Packaged the application into Docker containers and deployed on Kubernetes to ensure high availability and horizontal scalability.	

CI/CD Pipeline for Web Applications Technologies: Jenkins, Git, Docker, Nginx, Linux, GitHub Webhooks	GitHub Repo
- Built an automated CI/CD pipeline in Jenkins to streamline application builds, testing, and multi-environment deployments. - Configured GitHub webhooks to trigger automated deployment workflows upon code pushes, eliminating manual steps and reducing build failure rates.	

ACHIEVEMENTS

- Problem Solving: Solved 100+ Data Structures & Algorithms problems on **LeetCode**.
